

## Dairymen Win A Victory; to Fix Price Soon

The dairy farmers of the Chicago dairy district won a big victory in their milk war which they have been waging relentlessly for the past several weeks.

The embattled dairy farmers of Wisconsin, Illinois, Indiana and even parts of Iowa joined hands in this struggle and demonstrated that in organization and unity of purpose, there is strength. In former milk wars the farmers were unorganized and fought each other instead of fighting together for one common cause.

The members of the Pure Milk Association are to be congratulated on their splendid victory which finally caused the Borden and Bowman Companies to ask for a truce early Tuesday morning after the striking dairymen had effectively put a decided dent in the milk supply of Chicago.

Last Sunday a number of pickets from near the Wisconsin line came to Mokena and Frankfort and picketed the Bowman receiving stations and platforms. On Monday morning the force of pickets was increased and the cordon tightened so that no milk was shipped from either Mokena or Frankfort. At the latter point 40 cans of milk were dumped by the pickets when some outrage dairymen insisted on shipping.

No particular violence marked the strike in this section, quite a number of dairymen signed up with a number of small independent dairymen in Chicago who agreed to pay the association price of 95.00 per hundred weight for the duration of the strike and then to pay whatever price is determined on by the association committee.

Dairymen were divided on this contract, some being of the opinion that no milk should be contracted for with small dealers at all while others were of the opinion that the small dealers would force the big dealers to come to terms.

On Monday evening a mass meeting of the striking dairymen was held in the St. Mary hall in Mokena and about 100 dairymen were present.

A Chicago representative of the Pure Milk Association addressed the meeting and pointed out the need of effective organization on the part of the striking milk producers. Before going into the first preliminary conference Tuesday, Mr. Geyer gave out a statement in which he praised Dr. Kegel, Chicago Health Commissioner for his part in bringing about the meeting of the representatives of the dealers and producers Monday night.

"Beside Dr. Kegel great credit is due the radio, pupil and press for their part in bringing to a halt the strike and consequent settlement proceedings," said Mr. Geyer. "The public is to be commended for the sympathy given the farmers in the struggle for recognition of their rights. The committee appointed by the Wisconsin legislature, consisting of J. H. Vent and W. A. Duffy, did much to make a settlement possible."

Mr. Geyer said that the dealers in Monday night's conference granted everything the producers had asked, which included arbitration of the price to be paid the farmers.

Pending a final determination of the price squabble the retail price of milk, it was announced, is to remain unchanged.

The terms of the agreement, ordering the immediate resumption of milk deliveries to the various receiving stations of the Chicago milk dealers are as follows:

1. That all questions pertaining to the present milk situation shall be adjusted by mutual agreement in so far as possible. The matter of disputed points will be adjusted by arbitration. Dr. Arnold H. Kegel, commissioner of health, to name the arbitrator.

2. It is agreed that there shall be wholehearted co-operation between dealers and producers of milk in the Chicago milk zone.

3. There shall be full co-operation between the dealers and the producers to supply Chicago with a pure and wholesome supply of milk.

4. There shall be full co-operation toward the end of an even and sufficient supply of milk for the city of Chicago throughout the year.

5. It is agreed that all milk will be accepted from regular patrons of the distributors as of Jan. 1, 1929.

6. All plants shall be opened as soon as possible and patrons will be notified when to resume deliveries. All patrons shall deliver to the same platforms, plants or loading stations as of Jan. 1, 1929.

7. Further consideration of the price to the producer is to be given by the board of directors of the Pure Milk association, and the distributors. Pending this determination the retail price will remain unchanged.

Word of the agreement was immediately flashed to dairy farm centers throughout the Chicago milk area in Illinois, Indiana and southern Wisconsin, instructing that deliveries should be resumed and picketing called off.

Trucks have resumed hauling milk to Chicago.

## BANKS SHOW GOOD EARNINGS

That the past year was a good year is reflected in the dividends declared by the banks of this community.

The Citizens Bank of Frankfort at their recent stock holders meeting declared a ten per cent dividend and placed \$5,000 in the surplus fund. The officers of this bank are as follows:

President, Frank Folkers  
Vice-President, Otto Herschbach  
Cashier, Fred L. Hasenjaeger  
Assistant Cashier, Harold Folkers

The board of directors are comprised of the above mentioned officers and George Elsner and Jacob Feil.

The Frankfort State Bank held their annual stock holders meeting, January 8th and declared a 12 per cent dividend and placed \$3,000 in the reserve fund.

The officers and board of directors were re-elected and are as follows:

President, Wm. Lankenau  
Vice-President, Fred Warning  
Secretary, F. J. Kohlhaagen  
Cashier, John Luhring

Board of directors are the same as above with the addition of J. P. Bauch and Max Haass.

The Mokena State Bank stockholders meeting was held January 9 and a 12 per cent dividend was declared and \$700 were placed in the reserve fund.

The election of officers will be held next Monday.

The Orland State Bank reports a very good year and in addition to declaring a 6 percent dividend, and placing \$8,500 in the surplus fund, \$6,000 in the reserve fund and they also have built additions to the banking house, and many other improvements made including the installation of a new heating plant.

The officers of this bank are as follows:

President, Wm. T. Beagley  
Vice-President, Louis P. Daniels  
Secretary, E. J. Newton  
Cashier, George E. Gee  
Assistant Cashier, Frank Powell

The board of directors is composed of the above named officers in addition to Carl Bishop, Wm. McCasley and John Yunker.

The Bremen State bank at Tinley Park have declared a 12 per cent dividend. The following officers were elected:

President, Fred Henke  
Vice-President, George Schreiber  
Secretary, J. C. Funk  
Cashier, John Andres  
Assistant Cashier, Mrs. Elizabeth Hardinger

The New Lenox State Bank held their first stockholders meeting Wednesday morning. The following officers were elected:

President, Fred Francis  
Vice-President, Harry W. Storm  
Secretary, Henry J. Schlutz  
Cashier, Ceward Batson

Directors—Ceward W. Batson, Archie Corp, Fred Francis, Geo. J. Hacker, John Handorf, Jr., Ernest Oram, H. Rehn, Henry J. Schlutz, Harry W. Storm.

## Tinley to Exhibit at Chicago Floral Show

The regular business meeting of the Tinley Park Garden Club was held at the home of Mrs. R. Hug on Friday evening. The most interesting subject discussed was the coming garden and flower show to be given by the Garden Club of Illinois at the Hotel Sherman, February 25th to March 3rd.

A number of committees were appointed to take charge of the various exhibits which the Tinley Park Garden Club will display at the show.

After the adjournment of the meeting, tempting refreshments were served.

## PUBLIC SALE

Edw. Schmaedeke, Auctioneer.

Feb. 5—Mrs. E. Hammon, Tinley  
Feb. 12—H. J. Rust, Marley  
Feb. 16—Peter Bromberg, Homer  
Feb. 23—Paul J. Kientz, Homer  
Feb. 20—Walter Voss, Green Garden  
Feb. 21—Henry Krohn, Manhattan  
Feb. 14—Fred Zumahlen, Coopers Grove.

Jan. 29—Herbert Robinson, Green Garden  
Jan. 26—Postponed sale, Harry Hendrixson, New Lenox  
Jan. 30—George Morris, New Lenox  
Feb. 11—Martin Gast, Green Garden

## MEYER SALE BRINGS \$2891

The public sale held Wednesday on the farm of Mrs. Theo. Meyer at Coopers Grove was well attended in spite of the icy roads and netted \$2891. Edw. Schmaedeke of Orland was the auctioneer.

## The Town Doctor

SAYS:

OLD FASHIONED IDEAS WILL NOT STAND THE GAFF OF MODERN BUSINESS

Before he could dream of discovery Columbus had to cleanse his mind of superstition and prejudice. Only the man willing to free himself from the shackles of "what used to be" is ready to entertain the new ideas which lead to progress.

In every branch of science, of business, of art, and even of sport, this is true.

Community progress is not less in the hands of the discoverers. The great advances have been made by men who explored new fields, unfettered by prejudice or tradition, for a prejudice blinds a man to the truth and, too, to a prejudiced man no argument appears reasonable.

The advice of scientific business is to investigate yourself, your business and your town.

New business, new towns, are fortunate in not being fettered with old traditions and ideas, fortunate that they have no barnacles on their ships; but many towns date back a long way and too often refuse to accept new ideas and new ways of doing things. For that reason they fail to grow, fail to advance and keep apace with modern times, existing in a modern day with thoughts, ideas and ways of doing things of the past modern opportunities are not recognized.

Old-fashioned ideas will not stand the gaff of modern business. If you are going to grow and do business with modern people you have to be modern, for new-fashioned buyers avoid old-fashioned sellers. The old-fashioned people and old-fashioned business will soon be gone and then "What is, will cease to be," for the town that has not kept up to and ahead of time.

Old-fashioned does not necessarily mean older people. It does mean those people who, because their grandfather before them did a certain thing in a certain way, think that that is the only way it can be done; the fellow who says his way and his idea is always right and the other fellow wrong; the fellow that, because he cannot do it or see how it is done, says it can't be done. In other words, it means the fellow who condemns everything which is beyond his range.

The only old-fashioned people who can be considered assets in the world of today are those that retain the boy mind; that is, those that are still capable of wonder, enthusiasm and experiment. When these three elements fail, the man who is out of his grave is out of place as far as progress is concerned, for a man can appreciate only that which he knows.

Things are changing these days, and changing fast. Good roads, automobiles, trucks, busses and aeroplanes are responsible for much of it. Radio and telephone are rushing us along to a new day, and the town that doesn't start DOING will some day be a village of the past.

Thinking people recognize that there is a new order of things, but the recognition is more evident in business than in the development and conduct of civic affairs. Business science has changed man from a fighting, hunting, furtive biped, traveling on foot or paddling a canoe along winding rivers, painfully and slowly through the solitude of the great spaces, to a ruler of the earth, flying thru the air, saluting under the sea, sending messages around the world without messengers or wires. You KNOW this, because you have seen it.

This same science will ring forth even greater strides of development and change in the ways of doing things when applied to cities, towns and communities. It WILL be applied—IS BEING applied. Because you have not SEEN it you may not KNOW it, and not knowing it, fail to appreciate it.

Every town should recognize the advantages of this new order of things and start NOW to DO that which is necessary to capitalize on the opportunity; but to do it, old superstitions, and prejudices, if you have any, must be wiped out and a realization of a new order of things kept uppermost in your mind.

THIS TOWN DOCTOR ARTICLE, ONE OF A SERIES OF FIFTY-TWO, IS PUBLISHED BY THE NEWS-BULLETIN IN COOPERATION WITH THE TINLEY PARK LIONS CLUB.

## ELMORE TINLEY PARK SUBDIVISION BOOM MEANS 100 NEW HOMES BY SPRING

The new Elmore subdivision to the southwest of Tinley Park, is enjoying a decided boom. The first 10 model homes are now under construction. They will be built on a plot of ground 100x600 feet. A good number of these homes and lots have been sold. Last Sunday a large number of home-seekers visited this subdivision and it is understood that seven more of these homes were sold. It is said that by May 1st close to 50 new homes will be built and that about 100 new houses will be erected in the entire subdivision.

It is understood that as soon as this subdivision is built up, another one may be started north of Tinley Park. As the new subdivision now being developed is outside of the incorporated limits of the village of

Tinley Park, the water supply for the new homes is to be supplied by wells which are being drilled on the property now.

From present indications Tinley Park will have a big development in 1929. A number of local land owners in the village limits are also now planning to subdivide their holdings into residence lots.

It is understood that a big boom is scheduled to hit Tinley Park and surrounding territory within the next six months, but just what the nature of the boom will be, those in a position to know, are not prepared to disclose at this time. The business interests of the village are anticipating this move with keen interest. Tinley Park has a wonderful future ahead of it.

ing either the state highway or prohibition service.

Tinley Defeated; B. I. Lutherans Next

On Friday, January 18th the Steger teams defeated the Tinley Park teams.

The girls game was a great game in the first half, the score at that time being Steger 4, Tinley 1. The Tinley girls were trying hard for victory against one of the strongest teams of this part of the country and it seemed as if they might defeat Steger. But the Tinley girls let their possible chance of victory slip in the second half, Steger winning by 18 to 1.

The girls team will play the Lutheran team next Tuesday, Jan. 29. The light weight game was a thriller. The crowd was on edge every minute. They yelled and encouraged their teams on.

The Steger lights started with 3 successive baskets. Then Tinley, remembering three successive defeats, bucked up and tied the score at 6 apiece. Tinley then made a free throw just before the half ended leading Steger 7 to 6.

Everything looked "rosy" for the Tinley lights in the second half. They dropped in another free throw making the score 8 to 6. Steger then tied it with a beautiful long shot. The game was nearing the end and both teams fought frantically for the ball. In the mad scramble a foul was called on each team. By luck, Tinley made their's and Steger missed. Only a minute to go and Steger by virtue of luck sank two free throws making the score 10 to 9. Even tho Tinley lost such a game,

## Icy Walks Cause Mokenaites To Resort to Skates

The sleety weather of the forepart of the week left highways, pavements and sidewalks with a coating of ice as smooth as glass. In many instances ashes, sawdust and sand was strewn on the slippery walks and crossings helping materially in making them less smooth and passable. There were many falls but no one was seriously hurt outside of a few bruises.

In Mokena a number of citizens found walking well nigh impossible either on the streets or sidewalks so they put on their skates and skated to and from the stores carrying their bundles.

The cemetery hill south of Mokena has been so smooth that no traffic has been going that way, but has been diverted to route 51 and then to the Lincoln Highway. There is quite an incline on route 51 at the Geuther farm and this has been pretty difficult for autos and trucks to climb.

On Tuesday traffic was nearly at a standstill and the milk usually hauled to Chicago by truck has been shipped in refrigerator cars on the Rock Island.

There are skating places galore now. Part of the Front street in Mokena has been flooded by the heavy rains and stretches of sidewalks have been submerged under a foot of water so that this street presents a sight in spots akin to the famed canal streets of Venice.

Many autos were blown off the icy pavements on the Lincoln highway and route 51 Monday and on Tuesday, some cars landing in the ditches and either were pulled out by teams or were abandoned.

## Frankfort Girl Hurt In Chicago Auto Accident

Miss Evelyn Pfaff, daughter of Mr. and Mrs. Charles Pfaff, Sr., of Frankfort, figured in a rather serious accident in Chicago Thursday evening. Together with some friends, she went for an auto ride. The car skidded on the icy pavement and crashed into another car. Miss Pfaff was quite badly hurt and was taken to a hospital where she will have to remain for sometime. Soon as she is able to be moved she will be brought to her home in Frankfort.

## PHEASANT CASE POSTPONED

A week ago Motorcycle policeman George Smith arrested Richard Sims of Evergreen Park at Tinley on the charge of shooting pheasants out of season on the Albert Strasensburg farm near Mokena. The case was set for hearing before Judge Walter C. Dohl Saturday, but Sims asked for a continuance until this week.

The crowd was satisfied as they knew that each put in their best efforts.

The heavy weights game was just as thrilling. Score 23 to 19, Tinley heavies had some hard luck in their shooting, the ball seemingly to go in the basket, would ring out.

Next Tuesday, January 29 the postponed game with the B. I. Lutherans will be played. Three big games. Watch Tinley's heavyweights go after their first victory. Three defeats mean they are out for revenge.

On Friday February 1st, remember Homewood will come back for two encounters. Do not miss these thrillers.

## J. R. Bentley, Former New Lenox Solon, Dies

James R. Bentley, 69 years old, former member of the state legislature, died Tuesday night about 1:50 o'clock at his home, one mile south of New Lenox. He had been ill with heart trouble for the past two years.

Mr. Bentley was one of the best known men in Will County. He was born on a farm in Homer township, Sept. 3, 1859, and lived in that section until after his marriage to Miss Mary Agate of Orland, March 25, 1884.

In 1889 he moved to New Lenox township and a few years later purchased the farm which he operated until ill health caused his retirement from active participation in business affairs.

Mr. Bentley took considerable interest in politics for a number of years. In 1916 he was elected to the general assembly as a representative from the 41st district. He was reelected in 1918. Before his election to the legislature, he represented New Lenox on the county board of supervisors for six years.

Besides his widow he is survived by one daughter, Caroline, who lives at home, and a brother, George of Nebraska. One daughter, Beulah, preceded the father in death a number of years ago.

Funeral services will be held Friday morning from the home at 10:30 o'clock, the Rev. Thomas Ream officiating. Burial in Elmhurst cemetery, Joliet.

## Asked View On Drivers License

The editor of this paper has been asked to give his views on the proposed drivers license law in the following letter from President Chas. Hayes of the Chicago Motor Club:

We should like to have your opinion on a Drivers' License Law.

We want to advocate the best law for Illinois, one that will be workable in practice, and which will reduce accidents.

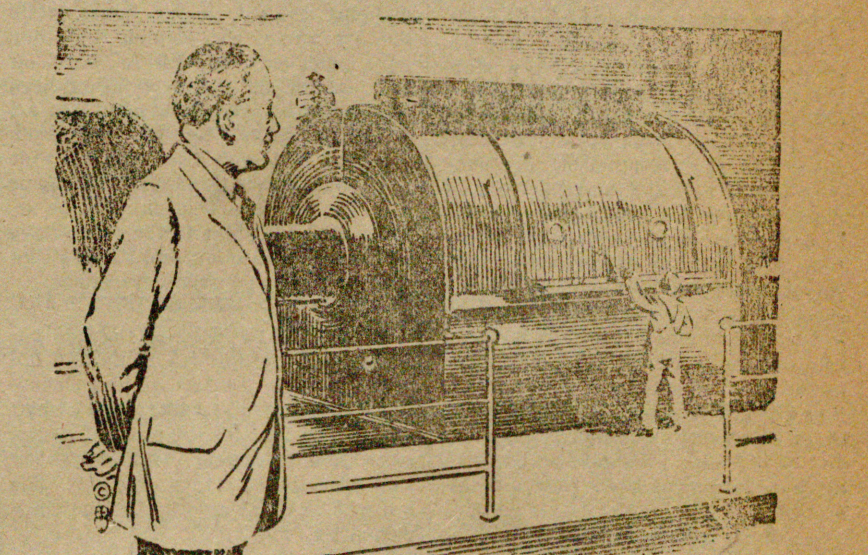

It is the opinion of some advocates of a Drivers' License Law that an examination feature is necessary. On the other hand others, including ourselves, have thought that the real merit in a license was the power of revocation and suspension of licenses vested in courts of record. We have thought that an application in the form of an affidavit could supplant the mental and physical examination feature. What do you think? Won't you be good enough to let me have your views?

Yours very truly,  
CHAS. M. HAYES  
President

In reply to your inquiry as to my views or opinion on a Drivers License Law, will say I am heartily in favor of such a law. I have read over the bill which it is proposed to enact a law and find many points of merit which I believe will lessen accidents.

I feel that there is one feature, however, that has been overlooked and that is that there are many auto drivers who hold licenses now who are reckless, incompetent drivers, many of them drunks and speed maniacs who would not be reached by the proposed new law. In my opinion every auto driver, whether he or she holds a license now, should be required to take a mental and

## WHAT OF YOUR "DEPRECIATION?"

A machine is only new once. Constant use brings "depreciation" and its owner must make provision for the time when it needs repair or quits functioning altogether.

The same goes for man. In his youth he has strength, stamina, an alert mind. He's at his greatest earning power. But age brings "depreciation" for which he should provide.

The moral is SAVE. Open a Savings Account now with the—

## STATE CAPITOL NEWS

Hiram L. Williamson  
Illinois State Association

All of the noise and excitement accompanying the opening of the general assembly and the inaugural ceremonies, of Louis L. Emmerson as twenty-seventh governor of the state of Illinois have subsided and activity in the capital city is almost normal; the new officials are settling down to the hard work of organization and the general assembly is showing unprecedented activity in an effort to comply with Governor Emmerson's request that the session be held to ninety days. On the first day there were 10 bills introduced in the senate and two in the house. The grand total increased on the second day when there were 12 bills introduced in the house and four in the senate.

The inauguration ceremonies were undoubtedly the most brilliant the capital city has ever seen. The events of the day began when the state arsenal was opened and placed under the supervision of Illinois National guardsmen. From ten o'clock to eleven o'clock the concert band of the University of Illinois presented a program. The inaugural procession, headed by an armed military escort, formed at the executive mansion at 11:30 and proceeded to the state arsenal. At noon the legislature met in joint session at the state arsenal and the inauguration services were held with Chief Justice Frederic R. De Young of the State Supreme court administering the oath of office to the new officers. Governor Emmerson delivered his inaugural address at this time. At five o'clock Governor Emmerson was the guest of the officers of the national guard and naval militia, at a dinner in the St. Nicholas hotel. A public reception was given by Governor and Mrs. Emmerson and other state officials at the executive mansion in the evening. The scene of activities was again transferred to the arsenal after the reception and the Illinois Watch band entertained for an hour before the grand inaugural ball under the direction of the Hamilton club of Chicago was scheduled to start.

Governor Emmerson was just a plain citizen for four hours before his inauguration took place. His successor as secretary of state, William J. Stratton, was sworn in at 8:15 a. m. in the state house, although the other officers-elect did not take their oaths until the inaugural ceremony which was held at noon. Mr. Stratton was sworn in by Chief Justice Frederic DeYoung before Mr. Emmerson took oath as governor to remove any possible question being raised of the latter's eligibility to hold the office of governor. Mr. Emmerson was sworn in with the other officers in the arsenal and had Mr. Stratton not taken his oath previously, the governor would not have had time to meet the requirements in changing secretaries of state.

Senator James J. Barbour, Chicago, has introduced a bill for the examination of automobile drivers under the direction of one of the state code departments of the governor. The bill has been endorsed by several organizations of the state but it is expected to be the subject of long debate when it comes before the assembly for consideration. Reapportionment hopped up as one of the early subjects for consideration. A measure was offered by Senator Herman Haensch, Chicago, calling for a senatorial redistricting of the state under the census of 1920. The bill does not designate the districts, this having been left for the assembly to fix up if the bill should be favored. Downstate, it seems, is as strong as ever against reapportionment. A bill by Senator Charles Baker, provides for an appropriation of \$400,000 for an armory and site at Rockford. Senator Reynolds offered a measure appropriating \$90,000 for a road to the west entrance of Starved Rock park in La Salle county.

The executive committee of the Illinois Agricultural association has announced that it will support a state tax on gasoline provided that the proceeds are used for the completion of the state bond issue system of hard roads and that distribution of funds in counties be made on the basis of motor license fees, the county boards to determine which roads shall be improved. Limitation of the county highway tax will also be sought by the association, it was announced. The association also announced that it would continue to work for an amendment to the revenue article of the constitution giving the general assembly power to set up an equitable tax system and will resist attempts to increase taxes on farm property. Adequate appropriations for eradication of animal tuberculosis will be supported.

Former Governor Small plans to spend the remainder of the winter in Florida, according to an announcement which he made recently. He has been urged to take up golf but he prefers to travel and his trip may extend to several other states before his return to Kankakee.

A bill by Representative Ralph Church, Chicago, provides for the repeal of the quo warrant act of the last session, which prevents the ouster of constitutional officers. A similar bill has been offered in the senate.

In his inaugural address, Governor Emmerson recommended that the present general assembly consider legislation to meet the following needs:

Three cent gasoline tax.  
Appropriations to complete the Illinois waterway.  
Equal distribution of tax burden, with intangible property bearing its share.

Placing of constitutional amendment propositions on general ballot.

Definite building program at state institutions.

Transfer of Research and Educational hospitals in Chicago from control of the department of public welfare to control of the University of Illinois.

Consideration of restoring responsibility in parole matters to the director of public welfare and a superintendent of paroles and pardons.

Measures presented by farming interests.

Expansion of the University of Illinois.

Governor Emmerson also spoke of and advised legislation for the following:

Chicago car franchise settlement.

Restore prosperity to Illinois coal fields.

Strengthen the hands of law enforcement officers.

Adequate state highway patrol.

Reapportionment satisfactory to both Cook county and the downstate.

Ballot protection.

Centennial building addition.

Improvement of capitol buildings and grounds.

Completion of national guard organization.

Amplify veterans' hospitalization and rehabilitation.

Aviation encouragement and regulation.

Development of state and Chicago parks.

Conserve and restore natural resources.

Expedite legislation.

Eliminate unnecessary positions; require full-time service.

Curb cost of government.

Bricks from the walls of the ancient city of Ur of the Chaldees, made 3,500 years B. C., showing the finger prints of the makers, will be shown at the coming American Ceramic exposition which will open at the Stevens hotel in Chicago, February 4. In startling comparison a newly developed building material, made from clays chemically and mechanically treated, with which it is hoped buildings 125 stories high can be erected, will be exhibited for the first time anywhere. This mystery material, developed in a Chicago laboratory, is so light that it floats on water but it is very strong and, it is claimed, is as fire-resisting as granite. Colors in pottery and tile, duplicating the "lost colors of Egypt," will also be shown for the first time. The exposition, under the auspices of the American Ceramic society, will be open to the public. It is the first exposition of the kind ever attempted in the United States.

Governor L. L. Emmerson took his oath of office on a Bible especially secured for the occasion. It is a flexible leather bound book of the Authorized King James version, Oxford edition, printed by the University press. The book was opened at I Kings, 3:8-9, which reads as follows: "And thy servant is in the midst of thy people which thou hast chosen, a great people, that cannot be numbered nor counted for multitude. Give therefore thy servant an understanding heart to judge thy people, that I may judge between good and bad; for who is able to judge this thy so great a people?" This Bible, after being appropriately engrossed, was presented to Mrs. Emmerson.

Repeal of the Illinois search and seizure law has been offered in the Illinois house of representatives by Representatives Charles Weber and Thomas O'Grady, Chicago, and the way is now opened for a test vote on the wet and dry issue. The measure, which has carried in the senate, but fallen by the wayside in the senate in former sessions, has been sent to the committee on judiciary. Wets are claiming control of the house while the dry are of the opinion that they have sufficient strength to ward off any assault on the prohibition laws of the state. The dries have not set the stage for their contest. It is probable that both wets and dries will wait until all bills on the subject of liquor are in and then a field day will be arranged. Dries point to the vote of the last national election and declare that Illinois remains in the dry column.

Representative King of Chicago has introduced the anti Ku Klux Klan bill which was the subject of long debate two years ago and which was defeated. It provides for the filing of names of persons belonging to this organization with the secretary of state. The bill will be considered by the judiciary committee.

Senator Earl B. Searcy will introduce in the upper branch of the assembly soon, a bill appropriating \$750,000 for the construction of an addition to the Centennial building. The new structure, to be used for office purposes only was recommended by Governor Emmerson in his inaugural address. Senator Searcy had a similar bill before the assembly a few years ago, which was enacted into law, but the appropriation lapsed when the work was not commenced within the legal limit.

## IT'S DANGEROUS GROUND

you stand on—with a cough, a cold or grippe, and your blood impoverished. You must do something! Dr. Pierce's Golden Medical Discovery enriches the blood—builds health and strength.

Mrs. Chas. Lindberg, 310 Oscar Ave., Joliet, Ill., remarks:—"I can highly recommend Dr. Pierce's Golden Medical Discovery for coughs and colds. When my children catch cold and begin to cough, I give them the 'Discovery' and it relieves them very quickly. I have never found anything so good for colds among children. Mothers will find the 'Discovery' excellent when children are subject to catching cold. In addition to clearing up colds and coughs, the 'Discovery' acts as a tonic, giving strength and vigor."

All druggists. Tablets or fluid. Send Dr. Pierce, Buffalo, N. Y., 10c if you desire a trial pkg. of tablets.

## Mothers—Try Mild Children's Musterole

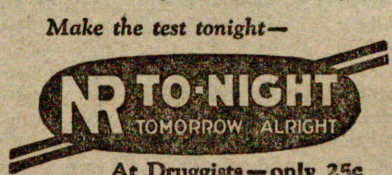

Of course, you know good old Musterole; how quickly, how easily it relieves chest colds, sore throat, rheumatic and neuralgic pain, sore joints and muscles, stiff neck and lumbago.

We also want you to know CHILDREN'S MUSTEROLE—Musterole in milder form. Unexcelled for relief of croupy coughs and colds; it penetrates, soothes and relieves without the blister of the old-fashioned mustard plaster. Keep a jar handy. It comes ready to apply instantly, without fuss or bother.

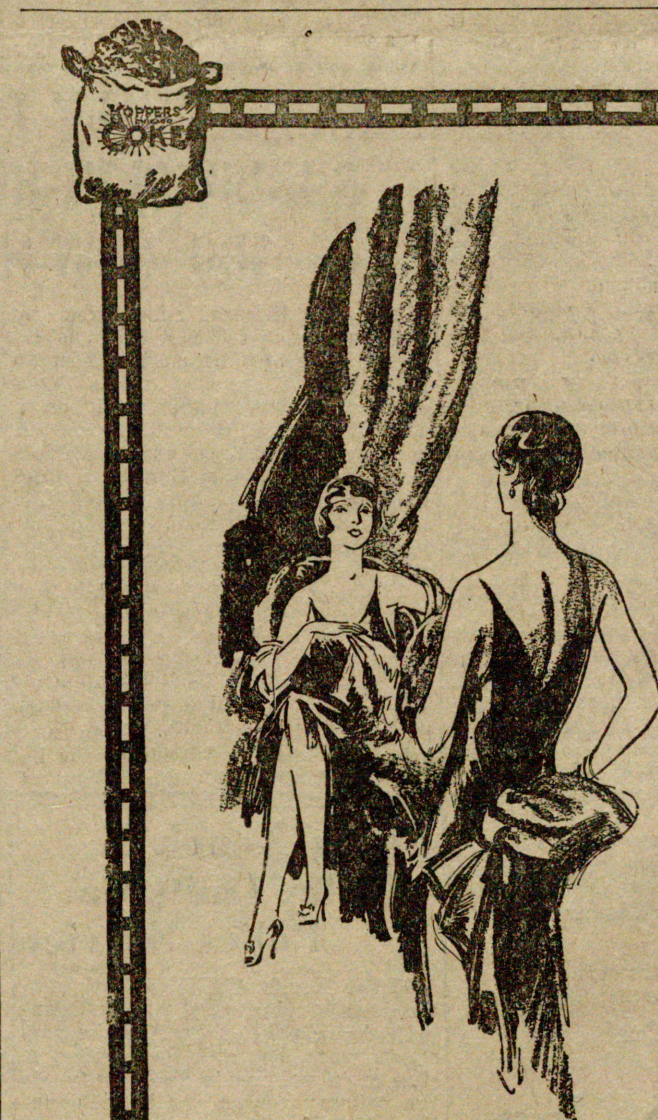

## Headache?

Instead of dangerous heart depressants take safe, mild and purely vegetable NATURE'S REMEDY and get rid of the bowel poisons that cause the trouble. Nothing like NR for biliousness, sick headaches, and constipation. Acts pleasantly. Never gripes.

Estopped  
"When unexpectedly called on to speak at the banquet I couldn't open my mouth."  
"Why not?"  
"It was full of spinach."

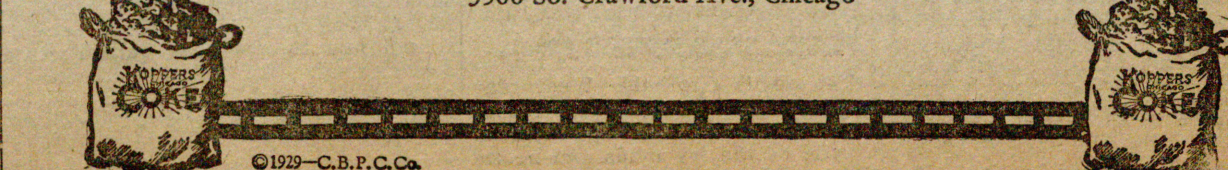

Nothing is impossible to the man who can and will.

Acclaimed by thousands of Chicago users, genuine Koppers Chicago Coke is smokeless and sootless—the clean, full-value fuel. Efficient and economical.

CHICAGO BY-PRODUCT COKE COMPANY

Manufacturers  
3500 So. Crawford Ave., Chicago

## No Getting Away From Defilement of Pitch

When a man with a hitherto good character gets mixed up with some scandal, or allows his name to be associated with a shady transaction, it is often said, "You can't touch pitch without being defiled." Pitch is one of those singularly adhesive things which, touch it ever so lightly, leaves, if not a stain, at least an odor.

The correct quotation is, "He that toucheth pitch shall be defiled therewith," and many people would be inclined to look for it in the book of Proverbs. It is not in the authorized version of the Scriptures, but forms the verse of Chapter XIII of the book of Ecclesiasticus, one of the books of the Apocrypha—those sacred writings which are not included in the canon of Scripture.

## Attend the Party In Spite of Cold!

Don't despair some day your social calendar is full, and you awake with a miserable cold. Be rid of it by noon! You can, if you know the secret: Pape's Cold Compound soon settles any cold, yes, even one that has reached deep in the throat or lungs.—Adv.

## Fooled the Monk

Somebody's monkey was running around loose at Los Angeles and a policeman was delegated to catch it. He tried various traps and lures, but the monkey would not remain within arms' reach long enough to be captured. Then thinking of the old saying, "monkey see monkey do," he made a noose, thrust his head through the noose several times and then extended the trap gently toward the animal. The monkey put his head right through the noose and lost his liberty.

## Health Giving Sunshine All Winter Long

Marvelous Climate—Good Hotels—Tourist Camps—Splendid Roads—Gorgeous Mountain Views. The wonderful desert resort of the West

## Palm Springs CALIFORNIA

Write Croe & Chaffey  
**PARKER'S HAIR BALSAM**

## Guaranteed

We guarantee genuine Koppers Chicago Coke. If a trial order does not convince you that it is to your advantage to heat your home with this fuel, it is removed at our expense and your money refunded.

## Ask Your Dealer

to supply you with this superior fuel. Demand the genuine—ask for it by full name.

## SHOES TAKE ON IMPORTANCE; GIRLS' "DRESS-UP" ENSEMBLES

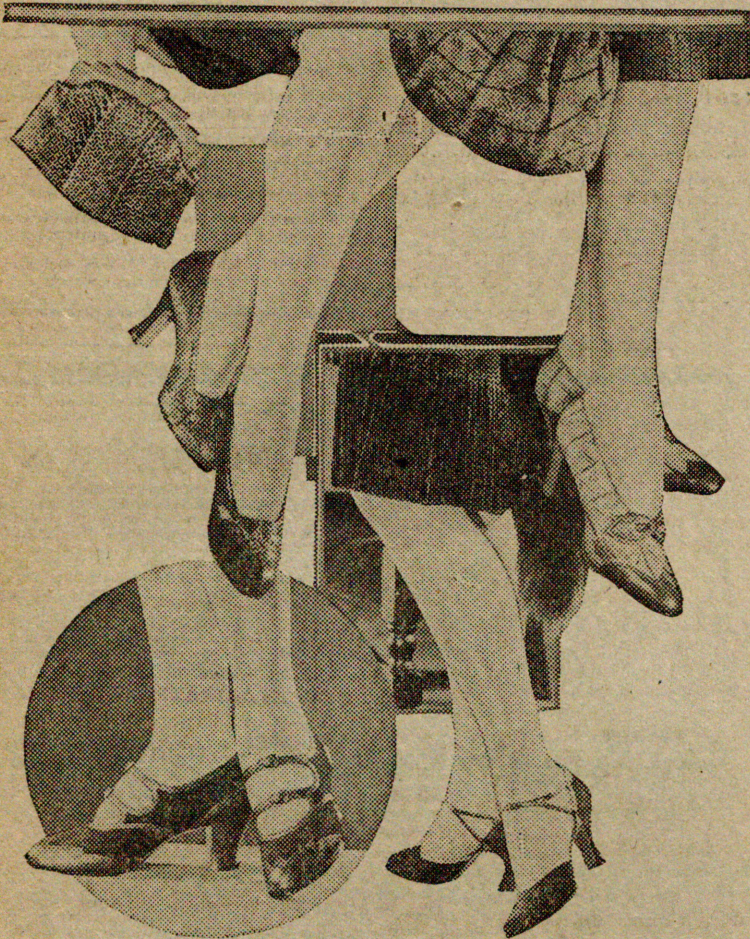

IT IS all very well to talk about shoes to match every costume, but it is far more clever and takes greater ingenuity to select shoes that are smart and appropriate with several different ensembles. For the woman of average income this shoe problem becomes increasingly difficult as each new season brings forth greater variety in color and material.

The four shoes pictured are suggested as a safe choice for the ward-

perfect complements to flat crepe and velvet afternoon frocks, and look well with coats of fur or cloth.

As much attention is being directed to the ensemble theme in the juvenile realm as in that of grownups. Not only do the shops emphasize the matching idea, but mothers who make their children's clothes are given every encouragement in the working out of interesting ensemble schemes.

Many who sew at home have every

Showing the Mode in Shoes.

robe of the woman who does not wish to buy models for every costume.

First in the picture is a tailored pump with solid leather "high-low" heel. It is of the type known as town and country—as smart for mornings in town as for the weekend in the country. It is in brown tweed trimmed with calfskin to match, and the pouch bag is in the same materials. These accessories may be worn with tweed costumes, leather coats and knitted ensembles as well as suits and coats in plain woolsens.

More formal in character because it has a leather-covered rather than a solid leather heel is the suede two-strap shown below to the left in either brown or black trimmed with matching calfskin. It might be well to mention, however, that the solid leather heel is definitely "in" again, and is made two lifts higher than it used to be, as quite a distinguishing mark. This suede model takes the place of the tweed shoe in the wardrobe of the woman who does not need a "special" shoe. It is not suitable for every occasion, lacking the swagger sports lines of the tweed styles and the extremely formal effect of the model with higher heel. It should be worn, however, with brown or black fur coats, and is smart with cloth coats in the new winter colors.

Glazed python is second only to suede in shoe fashion, and the pump

confidence in their ability to make little daughter's dresses, but when it comes to hats their courage fails, lest the child's costume might have a "homemade" look. However, now that there is such enthusiasm for ensembles, it is worth while to cultivate the "matching" habit.

If mothers who lack confidence and inspiration when it comes to hat making for their little folks, will ask at any pattern department they will find that the art of millinery has been made easy, at least as far as head wear for children is concerned. The style book contains pictures of hats, patterns for which are easily available ranging from berets to cloches and little turn-up brim effects.

Suppose there is a remnant of velvet or silk crepe or any suitable material in the house, if mother be ambitious, with little effort daughter may be costumed as handsomely as is pretty Miss Junior in this picture.

These straight-line-from-the-shoulder effects are the most popular for little girls at the moment. Sometimes the fullness is attained by gathering into a yoke as in this model. Another method is to smock the material to yoke depth. Still another smart styling is to lay the material in fine plaits either box or side, stitching them flat at the top to form the yoke.

Lace collars and cuffs are considered extremely voguish on afternoon

Moody Bible Institute of Chicago.)  
(©, 1928, Western Newspaper Union.)

### Lesson for January 27

#### THE HOLY SPIRIT

LESSON TEXT—John 16:7-11; Romans 8:12-17, 26, 27.

GOLDEN TEXT—For as many as are led by the Spirit of God, these are sons of God.

PRIMARY TOPIC—Our Unseen Helper.

JUNIOR TOPIC—Our Unseen Helper.

INTERMEDIATE AND SENIOR TOPIC—How the Holy Spirit Helps Us.

YOUNG PEOPLE AND ADULT TOPIC—The Work of the Holy Spirit.

I. The Personality of the Spirit (John 16:7, 8).

Personality is here implied by the use of the personal pronoun. In the original Scriptures personal pronouns are used uniformly in speaking of the Spirit. Then, too, He is called the Comforter. The word "comforter" literally means one called to stand by the side of another as a helper, counselor and guide. While Jesus sojourning in the world He was such to His disciples. He assured them that upon His withdrawal the Holy Spirit would take His place as friend, helper and counselor. The personality of the Spirit is also proved by the fact that He performs acts only possible to persons. In John 14:26 He performs the function of a teacher. He not only teaches, but He speaks as a person, giving direction to the disciples as in Acts 8:29 and 13:2. His personality is again proved by the fact that men act toward Him as they could act only toward a person. In Isaiah 63:10 the prophet declared that men vexed the Holy Spirit. It would be manifestly improper to speak of vexing an influence; only a person can be vexed. In Matthew 12:31 Jesus speaks of men blaspheming against the Holy Spirit. It would be impossible to blaspheme against an influence. In Ephesians 4:30 Paul speaks of grieving the Spirit. Again, it would be manifestly improper to speak of grieving an influence. Further, in I Corinthians 12:11 Paul speaks of the Holy Spirit exercising the function of will. One of the essential characteristics of personality is that of volition. The Holy Spirit is represented as divine. He has the attributes of deity. In Psalm 139:7-9 He is declared to be omnipresent; in I Corinthians 2:9-11 omniscient. He also performs the works of God. He is the creator and renewer (Ps. 104:30). He is called God in Acts 5:3-4, and II Corinthians 3:18.

II. How Believers are Related to the Holy Spirit. They are regenerated by Him (John 3:5-8); they are indwelt by Him (I Cor. 6:19 Gal. 4:6). He also fills (Eph. 5:18 and Acts 4:31). To be filled with the Holy Spirit is the duty of every believer. No one has the right to perform any work for Christ without this filling (Luke 24:48, 49; Acts 1:8). Even the temporalities of the church should be in the hands of Spirit-filled men (Acts 6:1-3).

III. What the Holy Spirit Does (John 16:8-11).

1. Convicts the world of sin (v. 8). The one awful sin of the world is unbelief. The Holy Spirit convicts the people of the world of their error concerning sin and shows their guilt before God.

2. He convicts the world of righteousness (v. 10).

The resurrection and ascension of Christ prove that He is the Righteous One, and that righteousness is only possible as He is accepted as Savior.

3. He convinces the world of judgment.

To be convinced of the reality of judgment is the crying need of the world today. Sin unatoned for shall be punished. The sinner who refuses the righteousness which God provided in Jesus Christ also shall be judged.

4. The Spirit mortifies the deeds of the flesh (Rom. 8:12, 13).

The only way to get the victory over our carnal natures is to give the place of rulership to the Holy Spirit.

5. He leads the believer (v. 14).

The Spirit-filled believer lives the life of the Son of God.

6. He gives assurance to the believer (Rom. 8:15-17).

The Holy Spirit witnesses together with the human spirit to the reality of the new birth.

7. He enables the believer to pray according to the will of God (Rom. 8:26, 27).

While the believer does not know how to pray as he ought, the Holy Spirit helpeth his infirmity. All prayer which the Holy Spirit indites the Heavenly Father answers.

#### Partner of the Lord

Every young man and woman should be a junior partner with the Lord Jesus for the salvation of the world.—Jacob Chamberlain.

#### A Ruined Day

The whole day may be ruined by an impatient word, a prejudiced judgment, a hasty decision, a fit of ungoverned temper.—J. C. Masse.

#### All Prayers Not Answered

I have lived long enough to thank God that all my prayers were not answered.—Jean Ingelow.

#### Battle Won by Prayer

Why talk so much? The battle is won by prayer.—J. W. Lee.

## Made Lime Kilns of Etruscan Crematories

In ancient times cremation was practiced throughout the civilized world with the exception of Egypt, where bodies of the departed were embalmed, in Judea where they were placed in sepulchers, and in China where graves were made in the earth. In the other countries there were few exceptions to the general custom of cremation. Among these, however, might be mentioned those persons who had taken their own lives, unteethed children and persons struck by lightning.

An Italian archeologist recently discovered what he declared to be the crematories used by the Etruscans, the mysterious civilized people who preceded the Romans in that country and who vanished more than 25 centuries ago. It was discovered that the Etruscan crematories were made use of by the conquering Romans in a strangely practical way. The arched fire chambers, in which an intense fire may be maintained, were turned into lime kilns.—Detroit News.

## With Every Dose, I Say: "God Bless Milks Emulsion"

"At last, after nine and one-half years, I am really getting well. I feel perfectly well (think of it!) and I am sure no one came so near to the pearly gates and missed going through."

"Yesterday a doctor said to my mother: 'My God, Mrs. Stultz, this thing is a miracle that she will get well!' My mother smiled her radiant smile and said: 'It is time you gave the public something for their money; tell them to take Milks Emulsion.'"

"I have spent fifteen thousand dollars in doctoring, climates, etc., and one bottle of Milks Emulsion is worth more than all they did for me put together, and I have had the best medical advice in the world."

"As I said before, I am feeling fine and the rales are all gone from my chest; have no cough, but I am not taking any chances of getting a relapse, so I am going to stay right in bed and take Milks Emulsion until I get my weight back."

"I look down at my feet sticking up in the bed and say: 'By golly, babies, you are going to do some walking now. Cheer up; your day is coming.'"

"I can't tell you how happy I am, and I love the Milks Emulsion Company. Faithfully and affectionately yours, ANAMAE STULTZ, Colfax, Calif." Jan. 28, 1927.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

In the Lisbon earthquake in 1755, a tidal wave which gathered off the coast of Portugal was 60 feet high when it reached Lisbon.

# RADIOLA 60

- a set to be proud of

Product of three great companies—RCA, General Electric and Westinghouse. Very compact. Expertly designed and built of the finest materials for long life and high quality performance. Single dial—just plug it in on your lighting current.

\$147 (less Radiotrons)

Any Radiola or RCA Loudspeaker may be purchased on RCA Time Payment Plan from your local RCA Dealer.

## RCA RADIOLA

MADE BY THE MAKERS OF THE RADIOTRON

#### Rich Literary Gift

More than 10,000 letters, dating from 1790 to 1875, written by Wendell Phillips, William Lloyd Garrison, John Brown, Charles Sumner and others, have been presented to Syracuse university by Gerrit Smith Miller, of Petersboro, N. Y.

#### Not Many of Them

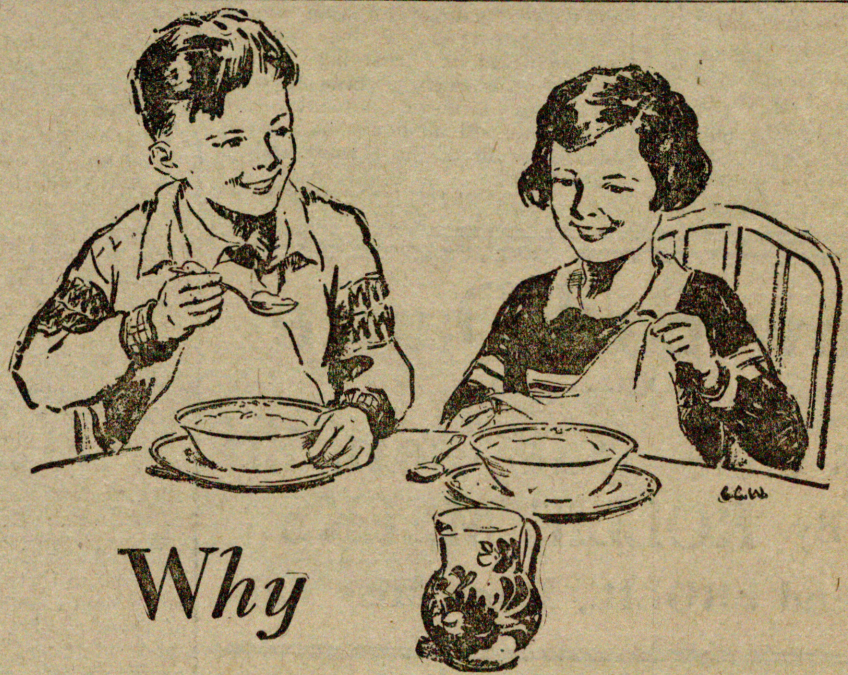

Lady (to cook)—So your sweetheart is called Timotheus—that is a very uncommon name.  
Cook (flattered)—Yes, ma'am. I have only had two sweethearts who have been called that.

#### It Isn't Being Done

"Here's woman charged with stealing a pair of silk stockings and hiding them under her skirt."  
"How out of style!"

#### Not Too Exclusive

"I hear she is very exclusive."  
"Well, I don't know. She associates with other people sometimes."

## Why children should eat KARO on cereals

LEADING physicians now recommend Karo as the ideal energy-giving food for growing children—

Not only is Karo delicious and fully satisfying to a child's craving for sweets—

But Karo does not cause a child to develop an abnormal taste for sweets—nor does it affect the digestion or appetite.

There are 120 calories per ounce in Karo—nearly twice the energy value of eggs and lean beef, weight for weight.

Serve the children plenty of Karo—keep them strong, healthy and happy.

Note—Compare the price of Karo, pound for pound, with other staple foods. Isn't Karo economical?

Nifty Costume for a Little Girl.

and matching bag pictured above to the right feature these leathers to advantage. This pump, assymetric in line, supplements the suede models with high heels, and because of its material is even more the model for dress wear than the latter.

The new elegance characteristic of this season's styles creates the need for such shoes as the suede model with narrow strap, which concludes this group. It comes in dark blue, black, brown or bottle green suede with strappings and insets of matching lizard. These suede models are

frocks for grownups, and they make equally as modish an appearance on "dressy" dresses for little girls. The ones in the picture are handsome Irish crochet.

As to the dainty chapeau which this winsome little miss is wearing, it is made of the same navy blue chiffon velvet as that of the frock. The crown has a bias piece gathered about a circle of the velvet. The flare brim is faced with pale pink georgette which is cleverly shirred.

JULIA BOTTOMLEY.

(©, 1929, Western Newspaper Union.)

## CORN STALK PAPER

THE closing month of 1928 records an event which should go down in history as an important one in the field of printing throughout this and many other countries—the successful manufacture of paper from cornstalks.

This event, unlike many of the big discoveries of the past, has not been what might be termed a "happening", but is the culmination of many years of experimental work both here and abroad.

The early experimenting in this country did not develop particularly gratifying results and for some years further effort to convert cornstalks into paper was practically abandoned. In the meantime, Mr. Bela Dörner, a Hungarian chemist, was working on the problem and finally brought his experiments to a successful conclusion.

An American chemist named Frank K. Gardner was traveling in Europe two years ago where by rare chance he met the Hungarian chemist, Dörner, who related to him the successful results that had finally attended his experiments which had been spread over a period of nearly twenty years. He at the same time informed Mr. Gardner of the fact that he had been unsuccessful in Europe. The import of his story greatly impressed Mr. Gardner who made sufficient investigation while there to satisfy himself as to the validity of the claims made by this Hungarian chemist and immediately upon his return to New York, he was able to interest a New York capitalist, W. Jule Day.

Mr. Day and Mr. Gardner formed a company which promptly closed negotiations with the Hungarian chemist, Dörner, to come to America and bring along his corps of assistants. A test laboratory was established in the Spring of 1927 in New Jersey. Dörner's work was closely watched by several American chemists who had themselves tried unsuccessfully to accomplish the same end. They were at first skeptical but Dörner finally convinced them.

The experiment work has finally been climaxed by the first mill run of cornstalk paper to come off a paper machine. This was produced by The Kalamazoo Vegetable Parchment Company in early December and then fittingly converted into 250,000 farm journals—The Prairie Farmer issue of December 15th—and distributed to farmers throughout the middle west, heralding to them an event that will perhaps be of greater immediate interest than the same event will be to the printing world.

Nevertheless for several years there has been considerable concern among the users of paper as to just how soon the rapidly diminishing forests would bring us face to face with a serious shortage in wood pulp unless some successful substitute could be found. The development of paper from cornstalks has been the direct outgrowth of this concern regarding our future paper supply.

With the cornstalk pulp industry in its infancy, we do not mean to infer that this source will definitely take care of our future pulp needs. However, after sufficient time is allowed for organizing pulp mills in the various corn growing centers, no doubt the cornstalk pulp will be quite a factor in the pulp supply.

It is our prediction that time will see further successful developments in the way of pulp production from plants. We discussed this subject sometime ago with a chemist friend who claims to have made some paper from a certain plant source which possessed a splendid long fiber well suited for paper making. Beyond what he claims were successful experiments, he, however, never made any effort to commercialize the idea.

Between the time of the establishment of an experimental laboratory in New Jersey in the early part of 1927 and the distribution of the first job in the form of an issue of the Prairie Farmer in December, 1928 other events of importance occurred. Chief of these was the establishing early in 1928 at Danville, Illinois, of a mill where cornstalk pulp could be manufactured in commercial quantities. The Cornstalks Products Company of Danville produced the pulp from which the Kalamazoo paper mill made this first run of cornstalk paper.

The Cornstalk Products Company's plant at Danville cost \$750,000 to build and has been turning out pulp for about three months at the rate of ten tons a day. An additional water supply, soon to be secured, will increase the output of this mill to forty tons a day.

The cornstalk produces a short fibered pulp, considerably shorter than usual is the case, yet it makes a paper of very good strength. The first paper made was a 40 pound machine finish of generally good appearance but considerably harder than the machine finish papers with which we have been familiar and somewhat transparent. The content of this sheet was 16 2-3 per cent wood pulp. Further experience in the use of this pulp will no doubt eliminate what appears to be some minor faults in the first sheet made.

It is said that wood pulp is used in varying proportions in 99 per cent of all paper manufactured—being eliminated entirely only from the better grade bonds.

It is claimed that pulp can be made from the cornstalk in six hours whereas it would require more expensive machinery and perhaps 18 hours to reduce wood to pulp, and some 30,000 more gallons of water to each ton.

The buyers of pulp seem to regard the cornstalk pulp as possessing about the same commercial value per ton as wood pulp.

It is cheaper to build a pulp mill in the corn growing centers than to make long hauls of cornstalks to the mills, hence the future will probably see a number of comparatively small pulp mills scattered thruout the corn growing belt.

An acre of corn will produce about 800 pounds of pulp and as there is upwards of one hundred million acres of cornstalks in the corn belt practically going to waste each year, a large percentage of this waste will no doubt be converted into profit to the farmer and the printer alike.

—THE PRINTING INDUSTRY

## The Story Of The Morning Star Mission

This paper takes pleasure in announcing that it is printing in a serial form the wonderful story of the Morning Star Mission in Joliet, and its illustrious founder, Peter McCarthy.

Following is the first installment. Next week the story will deal with the Christmas Dinner and tales of achievement.

The story is written by Willis R. Harrod, a Joliet newspaperman. "The Friend of Man!"

Surely, no one is more deserving of that title than Peter H. McCarthy superintendent and founder of the Morning Star Mission.

"Pete", as he is known to thousands of men, many of them wanderers on the face of the earth, is truly the friend of man, and no better proof of that can be found than the record of his mission.

Food for the hungry, jobs for the jobless, clothes for the naked, shelter for the homeless, cheer for the down-hearted, prayers for the sinner, help for the helpless; all these has the Morning Star Mission provided during the past year.

Unending love and sympathy for his fellow men has prompted Director McCarthy to go forth into the byways of the city, picking out with unerring vision and almost infallible intuition those who need his help and then bestowing it with loving hand.

Thousands have entered the doors of the little Mission on N. Collins Street and then departed with an entirely new outlook on life; departed with the full realization that hope was not lost and that with Christ as their guide they might yet scale the heights.

"No creed but Christ. No law but Love." That is the motto of 'Pete' McCarthy. And well has he lived up to it. No man has ever appealed to Peter for aid, showing real need, and gone away empty handed. All manner and condition of man has come under the mission director's brotherly love and all have found that which was sought.

No man has sunk too low in the abyss of human degradation to be beneath Director McCarthy's guiding hand. Lovingly he ministers to the needs of all, supplying the physical necessities and pointing the way to higher spiritual planes.

And Peter's activities cover many fields. They begin long before the sun has appeared above the horizon and last far into the hours of the night. For there is much to do and there's hardly time enough for the many duties to be performed.

It might be well to give a brief sketch of just what a day's work consists of in the life of Peter McCarthy.

Promptly at 6 o'clock each morning during the winter months, which is the busy season of the year, the "tourists" who have obtained a night's lodging at the mission are sent out on the streets, freshly breakfasted. The hour is early, but Peter, always an enemy of idleness, points out that the only way a man can find a job is to begin the search early.

Director McCarthy, of course, has been up several hours before six o'clock, providing for the needs of his guests and supervising the work of cleaning up the Mission, which rivals the most fastidious home in point of cleanliness, being subject to daily scrubbing.

Next on the day's program is the visit to the Union Station. "Pete" meets every passenger train stopping in Joliet, and finds the Union Station an unusually fertile field. There he finds boy runaways, men riding the brake beams beneath the coaches, unfortunates stranded without a penny and without friends. All of them receive aid in the form of food, clothing, advice, money or prayer, as the need may be, and all are sent on their way rejoicing.

Next, Peter takes himself to the police station and the county jail, for in those places are to be found many more unfortunates. And many of them are led again upon the path of honesty and uprightness by Director McCarthy.

A little later Peter takes up his stand on the corner of the First National Bank, for that is his "downtown office," and there he is to be found, day after day, rain or shine, scanning the faces of passersby for men in trouble. And Peter, guided by the love of Christ, can always spot the man who needs his aid.

Mid-afternoon finds Mr. McCarthy wending his way back to the Mission, his day's work only half done. There is the buying to be done so that the meals can be served the hungry men who apply for lodgings and countless other duties to be performed before the supper bell is sounded at the Mission.

"Pete" needs must greet each one of the "tourists" as he calls them, ascertain their needs, "trade" serviceable garments for the worn out clothing of the men, and mayhap conduct a quiet little prayer meeting for two, with the result that another soul is led to Christ.

After the hungry men who appear are fed, the regular mission service is conducted, and there are services each and every night. Usually Director McCarthy is assisted by noble volunteers, but he always opens and closes his own services.

Then Peter sees that his guests are put to bed. The casual visitor at the Mission invariably gasps with surprise when the long room where the "tourists" sleep is inspected, for it actually glistens as a result of the daily scrubbing and is a revelation to those who view it.

When "taps" has been sounded Di-

rector McCarthy seeks his own apartment on the second floor of the Mission, there to snatch a few hours sleep, unless some late arrival, in need of assistance, appears, as is often the case.

Sunday, instead of being a day of rest, means only more work, as an afternoon service is conducted for the children, of whom there are scores present each Sabbath.

From November until May the Mission is open nightly, and as many as 60 homeless, hungry men, get beds and food each evening. And unlike many other Missions, the Morning Star dispenses both food and lodging without price. "How can you feed a hungry man in the name of Christ and then demand pay?" Peter inquires.

Statistics are generally rather dull things, but the records for the past 14 years at the Collins Street Mission speak for themselves and are in consequence highly interesting. The records reveal, for instance, that Peter has provided lodging for 31,000 homeless men, enough to people a city half the size of Joliet. And 54,482 men have received food at the mission, while 6,004 have exchanged ragged clothing for serviceable garments.

Nor has the spiritual side of the work been neglected. Director McCarthy has 6,727 conversions to his credit, all but a small portion of them permanent. Gospels to the number of 15,276 have been distributed, 1,590 have received new testaments and 312 have been given bibles.

That Peter has the fullest co-operation of his board of directors, Joliet clergymen and scores of public spirited citizens as well as many civic groups in the community, was well illustrated at the 19th anniversary program, which was held Nov. 16, 17 and 18 in the Mission building on North Collins Street.

Converts of the Mission returned to add their bit of testimony as to the splendid work done by the Morning Star and its founder, while others came to tell of the spiritual benefits accruing from aiding the superintendent in his duties.

Peter made his annual report, shorn of useless verbiage, and it spoke volumes of the good done during the year just closed. Free meals were supplied 9,605 hungry men during the year, lodging was supplied to 3,502 more, while clothing was placed on 1,019 penniless men. Conversions numbered 579, Gospels were given to 1,400, New Testaments

to 210 and one bible was handed out.

The report shows that Director McCarthy made 318 visits to the police station and county jail, that he supplied relief for 47 destitute families, and that he paid railroad fares for 87 men, women and children. In addition he spoke in 16 churches and missions during the year.

Some people, while conceding the splendid work done by the Mission insofar as strangers in the city are concerned, have questioned its value to Joliet as a whole. The answer to this is evident. When 3,502 homeless men, destitute and hungry, are removed from the streets much crime is prevented. The Morning Star Mission is one of the greatest crime prevention agencies the city possesses.

The annual Christmas party of the Morning Star Mission should not be forgotten, as it is the one big event of the year for many children in the North Collins Street district.

Standing beside a Christmas tree in the Mission, Peter handed out 121 dolls, each bearing the name of a little girl. Four other tiny girls, regular attendants at the Mission, were ill and unable to attend the party, but "Pete" made sure that they too received their dolls. He also distributed toys to equally as many boys.

in addition to pounds upon pounds of candy and fruit for all.

Most of the dolls were donated for the Christmas party by Mrs. John W. Ford, whose husband has long been a friend of the Morning Star, and who is herself deeply interested in the little children who attend the service.

### Four Great Days of Spiritual Inspiration

Twenty Fourth Annual Founder's Week Conference February 5 to 8

at the MOODY BIBLE INSTITUTE AUDITORIUM

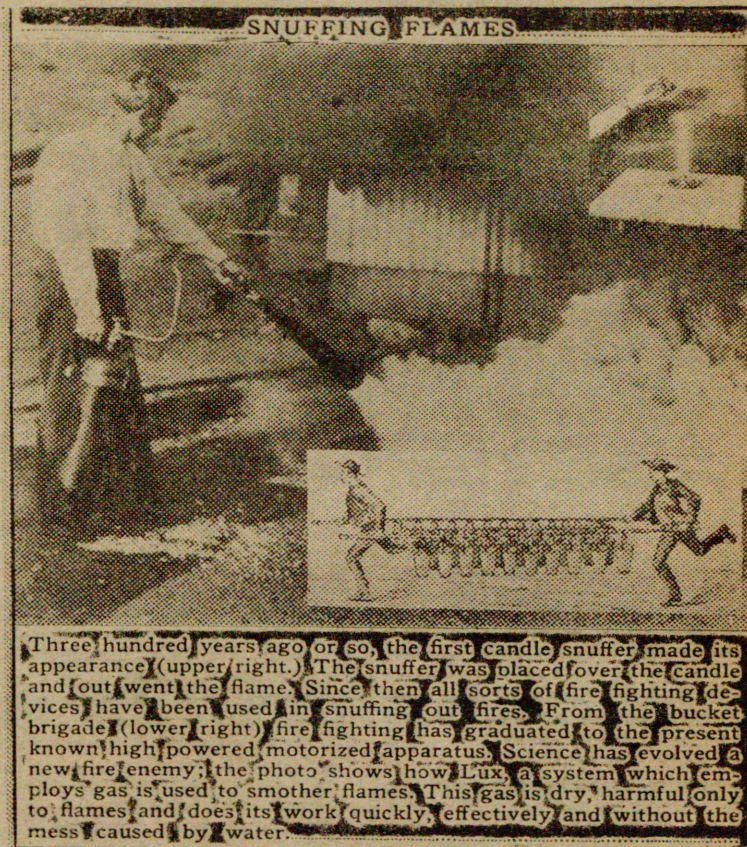

Cor. N. La Salle St. and W. Chicago Ave.

Tuesday: Alumni and Memorial Day Wednesday: Confirming and Strengthening the Faith

Thursday: Looking Toward the Future. Friday: Missionary Day

Many able and prominent speakers from both home and abroad will contribute to this spiritual feast.

Sessions: Daily 8:30 A.M. 2:30 and 7:30 P.M. Further information on request.

Three hundred years ago or so, the first candle snuffer made its appearance (upper right). The snuffer was placed over the candle and out went the flame. Since then all sorts of fire fighting devices have been used in snuffing out fires. From the bucket brigade (lower right) fire fighting has graduated to the present known high powered motorized apparatus. Science has evolved a new fire enemy; the photo shows how Lux, a system which employs gas is used to smother flames. This gas is dry, harmful only to flames and does its work quickly, effectively and without the mess caused by water.

Do you make any of these waste efforts?

Three Double Outlets for \$15.55

When more than three are installed, the additional outlets cost only \$4.55 each.

Duplex Convenience Outlets AT A SPECIAL PRICE!

Who has not wished for another place to connect conveniently and neatly a new lamp, a radio, table grill or waffle iron? An electric cleaner serves you better when you have a handy way to connect it in any room.

During the limited time of a special offer now in effect, you may have three or more outlet plates, each with two places for connecting appliances, installed anywhere in your home at greatly reduced prices. Have them installed wherever they will be most useful; in living room, dining room, bedroom, kitchen or hall.

The Public Service Company of Northern Illinois will be pleased to accept your order for any number of convenience outlets you desire. Through an arrangement with local wiring contractors, this Company will have the outlets installed in your home without delay. If you prefer, you may pay for the outlets the "Little by Little" way.

EDWARD SCHMAEDEKE, Auct.

## Cook County Truck Growers To Hold Meetings

On January 28 the University of Illinois will open the fifth annual truck growers school under the direction of the Department of Horticulture with the Cook County Farm Bureau, the Cook County Truck Gardeners and Farmers Association, and the Illinois Natural History Survey Co-operating. These meetings have been held on four consecutive years in Cook County for the benefit and advancement of the vegetable grower. Much interest has been shown in the past, and this year the meetings are to be held for five days in three different localities. This will give every grower in the Chicago area an opportunity to attend. The school will open January 28 at St. Matthew's School, Milwaukee Avenue and Ballard Road for a two day session. On January 30 the school will be held in the Masonic Temple La Grange, and on January 31 and February 1 a two day meeting will be held in Eagles Hall, Blue Island.

The school is headed by Professor J. W. Lloyd, Chief in Vegetable Gardening at the University of Illinois, and he will be assisted by various experiment station workers, experienced farmers, and members of the trade. An interesting and instructive program has been arranged which should prove both interesting and enlightening to all vegetable farmers who attend. Some of the particular phases taken up will be the results of fertilizer experiments in Cook County, management and construction of hot-beds, control of insect pests, standardization of packages and methods of grading, methods of marketing and various other subjects.

At these meetings growers have the opportunity of hearing all the recent experimental work pertaining to the production of vegetable crops, as well as exchange views on the more practical side of growing crops. Every farmer who grows vegetable crops on a commercial basis is urged to attend. A detailed program will be published in this paper at a later date.

## FRANKFORT

Mrs. Harold Folkers entertained the Pinochle club in her home, Friday afternoon. The game was played at 2 tables with prizes being taken by Mrs. Frank Cheney and Mrs. Herbert Minger. Refreshments were served by the hostess. Mrs. Peter Folkers will receive the club in her home on February 1st.

Mrs. Reimers is very ill in the home of her daughter, Mrs. Ernest Lenhart in Mokena.

Mrs. August Hossbach of Mokena is ill with pneumonia.

Virginia Warning has been ill with chicken pox.

Mrs. Ada Lewis of Detroit, Mich., who spent several days in the home of Mr. and Mrs. Manson LaHue, has returned to her home. Mrs. Lewis is a sister of Mrs. LaHue.

The Tractor school held in the Frankfort Hall, Saturday was well attended. The school was sponsored by the Hart-Parr Tractor Co., with Ray Warning as agent. Lunch was served.

Mrs. E. J. Stephen received word of the death of her brother, Jay Houft in Jackson, Michigan.

Marie Stellwagen entertained during the examination vacation in her home, Marjorie McClure of New Lenox.

Marie Scheer entertained the following girls in her home, Wednesday evening. Marie Stellwagen, Phyllis Baumgartner, Eva Jean Pfaff and Lois Baumgartner, complimentary to Bernice Ristau of Joliet who was her house guest.

Henry Stellwagen has been ill the past week.

Phyllis Baumgartner entertained the W. H. M. club in her home. Those present were Bernice Dammann, Evelyn Pfeiffer, Marie Scheer, Eva Jean Pfaff, Marie Stellwagen and Lolita Bettenhausen of Joliet.

The Royal Neighbors of America will sponsor an old time dance in the Frankfort Hall, Saturday night, January 26.

A large number of Frankfort people attended the silver wedding anniversary of Mr. and Mrs. John Yunker held in the parlors of the St. John's church at Mokena, Thursday evening, January 17.

Elizabeth Rahm of Chicago spent

the week end in the home of her parents, Mr. and Mrs. Charles Rahm. Dorothy and Lucile Geuther of Joliet spent several days with their grandmother, Mrs. Fred Baumgartner.

Services in the Frankfort M. E. Church have been changed. For Sunday January 27, Sunday school at 9:30 a. m. preaching at 10:30. On the following Sunday the services will be in the evening at 7:30. There will be morning services every other Sunday morning. Rev. Samuel Weishaar is the pastor.

## Hey There!

NEW LENOX P. T. A. WILL SERVE LUNCH

**Safety, silence and  
simplicity are features  
of the new Ford  
six-brake system**

ONE of the first things you will notice when you drive the new Ford is the quick, effective, silent action of its six-brake system.

This system gives you the highest degree of safety and reliability because the four-wheel service brakes and the separate emergency or parking brakes are all of the mechanical, internal expanding type, with braking surfaces fully enclosed for protection against mud, water, sand, etc.

The many advantages of this type of braking system have long been recognized. They are brought to you in the new Ford through a series of mechanical improvements embodying much that is new in design and manufacture. A particularly unique feature is the simple way by which a special drum has been constructed to permit the use of two sets of internal brakes on the rear wheels.

A further improvement in braking performance is effected by the self-centering feature of the four-wheel brakes—an exclusive Ford development. Through

this construction, the entire surface of the shoe is brought in steady, uniform contact with the drum the instant you press your foot on the brake pedal. This prevents screeching and howling and makes the Ford brakes unusually silent in operation.

Another feature of the Ford brakes is the ease of adjustment.

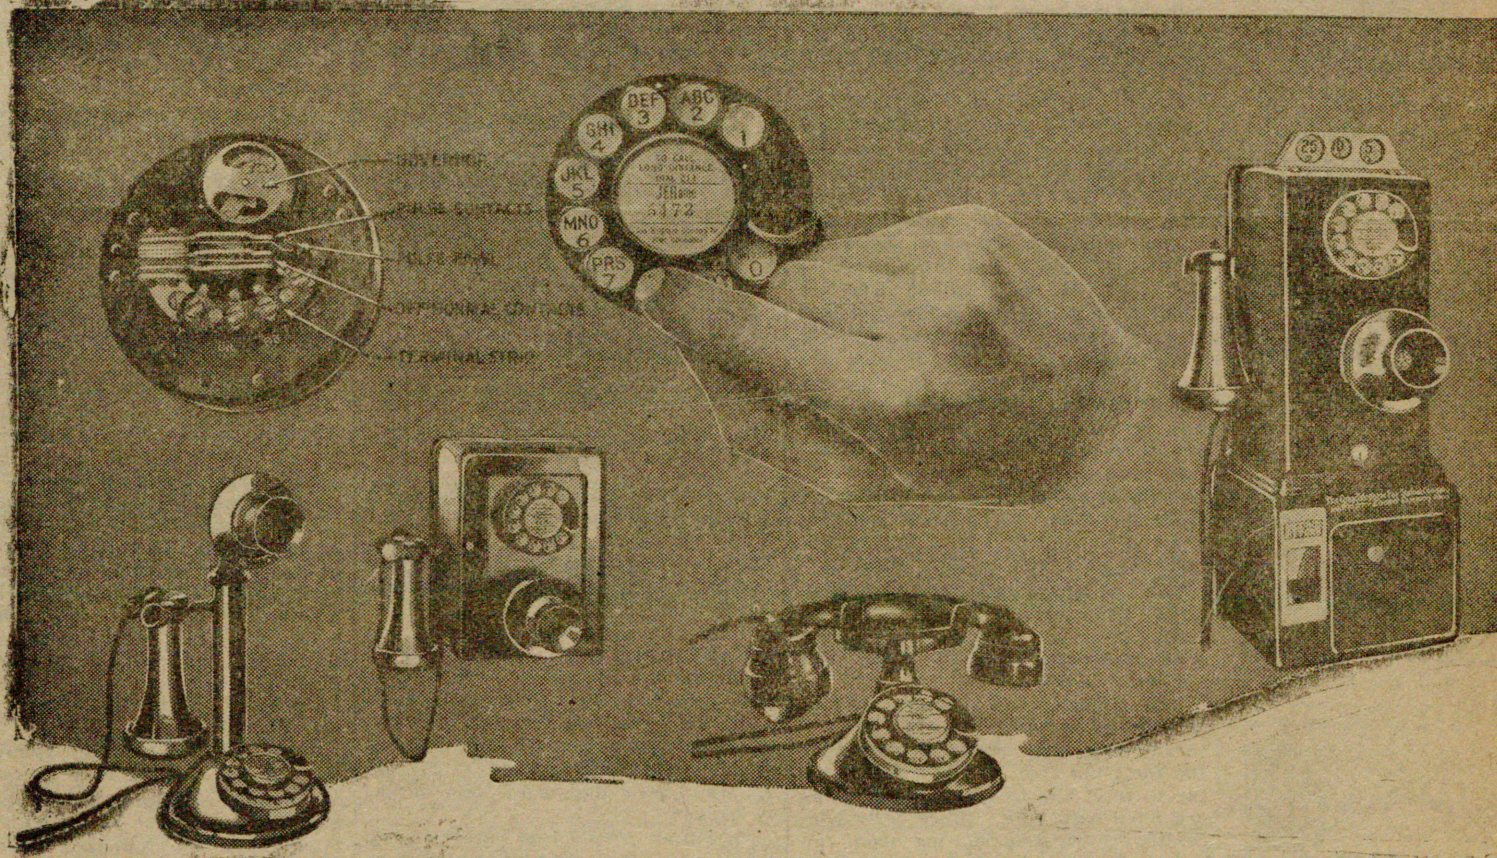

The four-wheel brakes are adjusted by turning a screw conveniently located on the outside of each brake plate. This screw is so notched that all four brakes can be set alike simply by listening to the "clicks."

The emergency or parking brakes on the new Ford require little attention. However, should they need adjustment at any time, consult your Ford dealer for prompt, courteous, and economical service. He works under close factory supervision and he has been specially trained and equipped to help you get the greatest possible use from your car over the longest period of time at a minimum of trouble and expense.

**FORD MOTOR COMPANY**

## Telephone Dial Talks Electrical Language In Giving Number to Central Apparatus

By C. E. DEAN

With the steady increase in the number of dial telephones in the United States, the public is becoming increasingly familiar with the dial by which connections are obtained without operators. This device directs the functioning of the marvelous apparatus in the central offices where the connections are made, which has been called the most intricate mechanism ever conceived by the human mind. This elaborate equipment is actually the work of many electrical and mechanical engineers, and its reliable operation is a tribute to the excellence of their work.

The function of the dial is to tell this wonderful apparatus what number is desired. The dial does this by talking electrically, and the apparatus understands this language. To be specific, the dial stops and starts the electric current flowing over the telephone wires, and does this the right number of times to communicate the number which the user dialed. The central office equipment notes these interruptions and thus learns the number which is wanted.

To use the dial is a simple matter. One merely puts his finger in the proper hole for the particular letter or digit, then turns the dial to the right as far as possible and removes his finger. The dial returns immediately to its normal position of its own accord. This completes the dialing of this digit or letter. The other characters given in the directory are dialed similarly, and in the total time of only a fraction of a minute the bell of the other person is ringing.

### How Dial Works

The rotation of the dial to the right by the finger winds up a spring inside so that as soon as the finger is removed the dial, driven by this spring, automatically returns to its regular position. During this return motion the dial produces the interruptions and restorals of the electric current which communicate the desired number to the central office apparatus. The dial produces these interruptions and restorals of current by separating and bringing together again the contacts on a pair of flat springs. These springs are mounted on the under side of the dial. When the contacts are separated the metallic path is broken and the current ceases. When they are brought together the metallic path, or "circuit," is complete and the electric current flows.

As the dial returns to its normal position after the finger is removed, these contacts are rapidly separated, brought together, separated, etc., until the proper number of interruptions has been produced.

### When 10 = 0

If the user dials the number "1," he turns the dial only a little way to the right with his finger before striking the stop, and the dial in its return motion produces one interruption of the current. If the user dials "5" he turns the dial farther, and, in returning, it produces five interruptions. That is, for each number from one through nine, the dial produces that number of interruptions.

But there is one case which is different, namely, for the digit zero. This cannot be indicated by zero interruptions of the current, for the

central office apparatus could not distinguish the lack of interruptions from a slight delay on the part of the subscriber. So zero is placed after 9 on the dial, and ten interruptions are made. The equipment at the central office "knows" that ten interruptions mean zero, and so makes connection correctly with the desired telephone number.

### "Robot" Helps Maintain Accuracy

The dial used on all subscribers' instruments produces the ten interruptions, or "pulses," that correspond to zero, in about one second. There are definite requirements, in fact, that the rate for subscribers' dials shall not be less than eight pulses per second nor greater than eleven pulses per second. If the rate of the dial is outside these limits, telephone repairmen can correct the condition by adjusting the governor which is mounted on the under side of the dial next to the flat contact springs.

Not only can telephone men readjust the rate of the dial, but they can do it in the home or office, or wherever the telephone is located. And it is done by calling in the assistance of a mechanical man, a "Robot," at the central office who senses how rapid the dial is, and reports to the repairman by code sounds whether the dial is too slow, or within limits, or too fast. In the most modern apparatus the repairman calls for this help by dialing a code number which connects him directly with the dial-testing Robot without requiring the aid of any person at the central office. The repairman then hears a tone in the receiver which tells him that everything is ready for the test.

Upon hearing this "go-ahead" signal the repairman dials zero,

which, as already noted, produces ten pulses. The mechanical dial-tester times these ten pulses by comparison with the motion of a pendulum, and immediately reports by suitable sounds whether the dial is all right, too slow, or too fast. The mechanical dial-tester even has another closer set of limits so that a dial being adjusted can be set to within these closer limits, and thus not need another adjustment for a long time. For subscribers' dials these closer limits are 9 1/2 to 10 1/2 pulses per second.

### Used Everywhere

In the heat of the tropics and the cold of the North, in greatly different conditions of humidity and without requiring skill on the part of the user, the dial produces its pulses accurately at the rate required. And it does this for enormous numbers of times—laboratory tests have shown that one dial will give service equivalent to 500,000 turns from zero, which, of course, at ten pulses per turn is 5,000,000 pulses. This is enough to make it certain that the dial on a subscriber's instrument will render service for many years.

More than 3,000,000 telephones owned by the Bell System are connected to dial offices, or nearly 22 per cent of the total. About 1,000,000 dials are manufactured by the Western Electric Company every year. This great output indicates that not only the total number of dial stations will increase, but also the proportion of dial to manual stations. The dial, indicative of one of the great loads taken off human shoulders and transferred to machinery, will more and more come to be universally known.

## Makes Life Sweeter

Next time a coated tongue, fetid breath, or acrid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

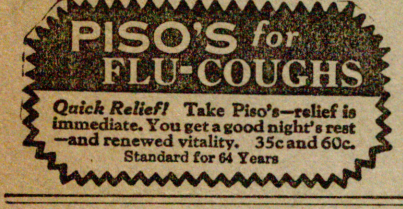

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips. Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

## A Romance of Braddock's Defeat

By HUGH PENDEXTER

Illustrations by Irwin Myers

Copyright by Hugh Pendexter.

WNU Service

### THE STORY

Webster Brond is serving as a scout and spy for the army under General Braddock preparing for the advance on Fort Duquesne. He has just returned to Alexandria from a visit to the fort, where, posing as a Frenchman, he has secured valuable information. Braddock, bred to European warfare, fails to realize the importance of the news. Brond is sent back to Fort Duquesne, also bearing a message to George Croghan, English emissary among the Indians. Brond joins his friend and fellow scout, Round Paw, Indian chief, and they set out. On the way they fall in with a typical backwoodsman, Balsar Cromit, who joins them. The party encounters a group of settlers threatening a young girl, Elsie Dinwold, whom they accuse of witchcraft. Brond saves her from them. The girl disappears. Webster delivers his message to Croghan. Young Col. George Washington rescues Brond from bullying English soldiers. He rescues a bully in a fight, and finds Elsie Dinwold. Brond is sent on a scouting expedition to Fort Duquesne, and finds a French scouting party besieging an old cabin in which Elsie has taken refuge. In the ensuing fight she escapes. Brond takes his way to Duquesne. Carrying out his plan to enter the fort unquestioned, Brond visits an Indian town which a woman sachem, Allaquippa, controls. There he meets a French officer, Falest, who has failed in his attempt to win over Allaquippa to the French cause.

### CHAPTER V—Continued

"Faugh!" exclaimed Falest. Whither do you travel?"

"I have been scouting far to the east, monsieur, in company with one of our Indians. I am on my way to Duquesne, and stopped here to see if the Indian woman is holding her red children from picking up our ax."

"Monsieur, she is a daughter of the devil. I have waited two days to offer her a belt. She sulks in her cabin and will not see me. Her men are uneasy. Today they are drunk and would take our belts if not for her. She opposes France. She must die."

"Of a certainty, Monsieur Falest. Our minds run as one. But the French must not appear in it, eh?"

"Pard! No. But an accident? Yes. One of her drunken warriors fires a gun. Behold! The old red shrew is dead. We will see. We will have patience for a bit. It must not happen—the accident—while any Frenchman is in the village. No, no. Now for the news. I am hungry to hear how it goes with Braddock and his army."

"The army is large and will bring much artillery. The road building goes on but slowly. How do our red children at Duquesne feel about it?"

"Ah, le bon Dieu! How can they feel? They believe the forest from Duquesne to the Potomac is filling up with red-coated English. They will not fight, I fear."

"Not fight! Run away without striking a blow?"

"Oh, they may strike a blow near the fort; but they will not come very far to meet the English. Their veins are filled with milk. Since early winter they have been hearing about the huge army Braddock will bring. Captain Beaujeu, who succeeded Monsieur de Contrecoeur as commandant, has great influence over them. What man can do, Captain Beaujeu will do. But they have not the great heart."

"Our only hope is to steal the Delawares away from the English and have them annoy the army all along the line of march. If this village and others would lay ambushes and keep on the skirts of the army and pick off their scouts and sentinels, then the English spirit might weaken. If the army can be harassed from the Little Crossing to the Monongahela by surprise attacks, our fort Indians might do something, at least enough to make the taking of the fort very costly and prevent Braddock from marching against Niagara, or sending aid to the army attacking Crown Point. Monsieur Beland, it grieves me to confide to you that Fort Duquesne is lost."

"Such talk is madness, monsieur," I hotly protested. "It will be time to say that after the fort has been taken. I shall hasten to Duquesne to tell Captain Beaujeu what I have learned, monsieur."

"Good! I will try again to see the old red woman and offer her our belts. There is another man here, much younger than you, who wishes to get through to Duquesne. He will travel with me. He is English but has a French heart. Allaquippa makes him welcome, but she will not send a body of her savages to escort him safe to the fort. She fears they might not return to her. Accompany me, if you care, monsieur, and witness how my last attempt turns out."

We left the cabin, and what few women and children and aged warriors we met eyed us with curiosity but with no enthusiasm. Falest nervously fingered the tiny ax pendant, and looped the belt over his left arm as we slowly walked through the vil-

lage I noted his gaze was ever wandering toward the forest on the north of the town.

"Monsieur expects some one," I murmured.

"Ah, Monsieur Sharp Eyes! Sacre! But you speak—true. The Huron should be here before this. Pardon, monsieur, if I appear distraught over the failure of one of our Hurons to arrive with war belts from the lake tribes. If the Huron had arrived last night, as arranged, we would make the old woman much afraid. A big show of belts might shake her out of her cursed partiality to the English."

And after all the Onondaga's ax had done good work in dropping the carrier of belts, I felt much encouraged.

Some children came running toward us from between the huts. They were followed by a dozen sullen-faced Delawares and some women. Then Allaquippa herself appeared, and walking by her side, still dressed as a man and carrying the short rifle of the Frenchman Beauvais, was the Dinwold girl. She gave a start of surprise on beholding me, but I made no sign of recognition, and she held her tongue.

Queen Allaquippa was withered or face and sharp of features, and very keen of eye. There was displeasure in her countenance as she gazed on us. She halted, and we did likewise.

"The English Are Cruel. I Will Try the French," She Sullenly Told Me.

some ten feet apart. Falest produced a long-stemmed pipe and filled it with a mixture of willow bark and tobacco. Lighting this, he took a few puffs and handed it to a warrior who gave it to Allaquippa.

The woman sachem hesitated, but her village was small and too close to Duquesne for any needless flouting of the French. She smoked. Falest spoke more for the benefit of the spectators than in a hope of winning over the sachem and used, in my estimation, poor diplomacy. He harshly began:

"Brethren the Delawares: Six months ago Onontio sent you a message, asking you to return to your old home on the Allegheny, but while Onontio has waited long and has been heavy of heart you have not come. Now Onontio fears the road has grown rough and your feet have become soft and tender. He sends you these four strings of wampum to clear away the sharp stones and briars."

He advanced and extended four strings of white wampum which Allaquippa received with open reluctance. Her beady eyes glittered malevolently as she met and held the Frenchman's gaze.

Falest stepped back and continued:

"Brethren, I am here to tell you that your father and my master, the king of the French, is coming to visit you and take you under his care. You must not listen to any evil words that you hear, for he will not hurt you. He has something to say to the English, but you are to sit still on your mats and not mind what your father does to the English, for he will not let

them live or tread on the River Ohio. Take this hatchet and hold it with a strong hand, edge against the English, and this shall remain your country."

He paused for a moment and stared intently into the set angry face of the woman and then advanced, holding the war belt in his two hands. She folded her arms and would not accept it. He hung it over her shoulder. With a twist of her body she dislodged it and it fell to the ground. Then, snatching the short rifle from the Dinwold girl, she flipped the belt to one side, taking great care not to touch it with her hands. In a deep masculine voice, she replied:

"Brother Onontio: I have heard from the English. The Delawares will not accept your war belt. Your hatchet flies in the dirt where you threw it. The road to the Allegheny was smooth and easy to travel. Then came the French to make it bloody and slippery. I will not take your belt. Give it to some of those warriors. They may take it and pick up your hatchet."

"The old red devil!" grated Falest, and he turned on his heel and stalked back to his cabin.

Now I had time to look at the Dinwold girl; she was frowning as if perplexed at my attitude. Allaquippa quickly demanded my attention by coming close and asking:

"What does the white man want here? Does he bring more red belts from the Ohio?"

"I came here to eat and rest before going to Duquesne."

"You talk our tongue like the French. You have a French heart."

It was necessary that all her warriors should believe this even though it meant that my hair might be in a hoop before I could make the fort. I declared my loyalty to France and was the target for many scowling glances. Allaquippa warned:

"Frenchmen do not sleep well in Allaquippa's town. They have bad dreams and dream they are ghosts. That a Delaware ax is sticking in their heads."

Without further speech she walked back to her cabin. The Dinwold girl lingered.

"What do you do here?" I asked. "Why are you not back at Will's creek?"

"I am English, mister, but I have found the English cruel," she sullenly told me. "Now I will try the French." With a flare of anger she added, "What is it to you where I go, or how I fare, mister?"

"You are a woman and need help."

"God forgive me, if he hasn't forgotten me! Yes, I have needed help. Three times you have helped me. If all the English were like you—" She turned from me while she conquered her weakness; then with a little toss of her head and a mirthless laugh she became the wild thing of Der Hexenkopf, and cried: "I am neither English, nor French. I am a daughter of a witch, of a family of witches. I make little children sick. I send sickness to cattle and dogs. They nail horseshoes over their doors to break my wicked spells."

"That's all behind you. You're very young. You can be very happy."

"Mayhap I shall find happiness among the French. If not with them, then among the Indians. I can stay here. The Indian woman knows I am a woman and likes me, I think. She is kind to me. Nothing can harm me here."

"And lead a red life and forget your white blood! It's unthinkable," I hotly protested.

Then I sought to reason with her and urged her to start back to meet the army. Allaquippa would give her an escort of Delawares. But the one wild notion of finding happiness away from the settlements fixed her small head, and she replied:

"I will go on even if I die in the woods. I have talked with Mr. Falest. He speaks good English. He knows I am a woman and promised he would tell no one. I believe he's an honest man."

"I too know Falest. I believe him to be an honorable man. I will talk with him not to take you to Duquesne; that you are young and do not know your own mind," I warned her.

(TO BE CONTINUED.)

## High Buildings Cause of Freak Whirlwinds

One may learn many interesting things about air currents and the way storms develop by watching the movement of pieces of paper or perhaps his hat as it is whirled about the street. A variety of miniature wind storms are caused by the high buildings of our cities or the forms of streets which well repay study.

On a hot day, when the air is perfectly quiet, the atmosphere as it becomes heated tends to rise along the sides of rocks or buildings, and if it travels high enough it develops into a strong wind, which descends on the opposite side and plays queer pranks. A small whirlwind is often produced by the action of wind against a cor-

ner formed by several buildings. As the wind travels down a street, especially a narrow one, it rapidly increases in velocity. A little will spill into the side streets, but the main stream will flow on gathering momentum. Observe this wind strike against the side of a high building and notice how it "mushrooms" out on all sides, splitting into many air currents, and trace these till they come to rest, but be sure to hold tightly to your hat in the meantime.

### Good Detour

The man who listens and lets the other fellow talk is on a good detour around trouble.—Atchison Globe.

## ASPIRIN

To break a cold harmlessly and in a hurry try a Bayer Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Bayer Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

## Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monosaccharide of Salicylic Acid

## Goblet of Friendship Never Yet Exhausted

I have drained the sparkling beaker of the magical brew of Youth and been thrilled with the wild tumult of its imperious urge coursing through my veins.

I have pledged my happiness with the blood-red goblet of Love and drank deeply of its sacred and intoxicating contents.

I have toyed with the tempting opal bowl of Ambition, but its dregs are bitter and may only be sweetened by libations from the crystal cup of Service to Man.

Then it was revealed to me that no one yet has drunk too deeply of the sacrament in the golden chalice of Friendship, without which even Youth and Love would lose their deepest meaning.—Dan Beard in the Pictorial Review.

### Better

"How is the new bridge getting on?"

"Written reports by the contractor are glowing."

"Tell him to send some photographs."

### Would Label Every Baby

If a movement started by William de Graaf, Pasadena, Calif., succeeds, there will be no "unknown soldiers" graves, mistaken identities, or passport difficulties in the future. De Graaf would have congress pass a law requiring all parents to tattoo the date, place of birth and name on their infants' bodies. "Such a marking would serve as a living passport," the promoter asserts. "It would always be a ready means of identification and in later life would keep persons from going where they would be ashamed to be found."—Capper's Weekly.

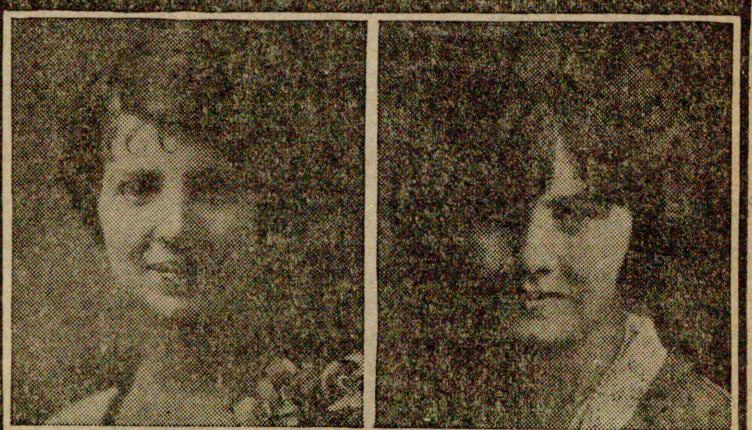

### Goggles for Dog Motorists

Thousands of pairs of goggles for dog motorists are being sold in London. Fond owners have learned that their pets love motoring, but dislike the grit that gets into their eyes. Well known and popular canines such as the prince of Wales' Cora, Lord Birkenhead's Jane, and Tallulah Bankhead's Napoleon, are all experienced motoring fans.

### Spellbinding

"You have held many audiences spellbound!"  
"Yes," answered Senator Sorghum. "But I didn't seem able to keep everybody well hypnotized after they got into the voting booths."

## SCHOOLGIRLS NEED HEALTH

Daughter of Mrs. Catherine Lamuth, Box 72, Mohawk, Michigan

"After my daughter grew into womanhood she began to feel rundown and weak and a friend asked me to get her your medicine. She took Lydia E. Pinkham's Vegetable Compound and her nerves and she has a good appetite now and sleeps well. She has gone to school every day since beginning the medicine. I will continue to give it to her at regular intervals and will recommend it to other mothers who have daughters with similar troubles."—Mrs. Catherine Lamuth.

Daughter of Mrs. Eva Wood Howe, 1006 South H. Street, Danville, Ill.

"I praise Lydia E. Pinkham's Vegetable Compound for what it has done for my fourteen-year-old daughter as well as for me. It has helped her growth and her nerves and she has a good appetite now and sleeps well. She has gone to school every day since beginning the medicine. I will continue to give it to her at regular intervals and will recommend it to other mothers who have daughters with similar troubles."—Mrs. Eva Wood Howe.

## MOKENA

The school mates of Muriel Jean Maue held a farewell party in her honor in the school Friday afternoon and presented her with a book as a token of remembrance. Muriel will soon leave with her parents for California where they will make their future home.

Mrs. John Horass is ill with the flu at her home in Chicago.

**MOKENA M. E. CHURCH NOTES**  
Glen T. Beaty, Pastor  
Church School 10:30 A. M.  
Evening Worship 7:00 P. M.

The pastor will preach as usual at 7 p.m. Sunday. The weather and sickness has handicapped our services during the past few weeks, but the loyalty of the people has made our services worth while. Let us so continue.

The church has been in process of redecorating during the past week or two. We have a more beautiful and a cleaner worship auditorium. The Sunday School has furnished the most of the funds. We are very proud of the work.

The oyster supper which was to have been held Friday night of this week has been postponed to Feb. 1.

**ST. JOHN'S EVAN. CHURCH**  
Rev. W. J. Cramer, Pastor  
Sunday School 9:30 A. M.

English services at 10:30 a. m. Sunday school 9:30. Divine worship 10:30. The pastor will preach the second series of the Lord's Prayer "Hallowed Be Thy Name". Come and hear these thought provoking and soul stirring sermons on the Lord's Prayers. It will do you good to worship with us one hour in our warm church. Everyone is welcome in St. John's. A glad hand awaits you.

The church board will meet Thursday evening for the regular monthly business meeting.

Sunday, February 3rd, the services will be conducted in the German language.

Mrs. Carl Hirsch will favor us with a vocal solo Sunday morning. Mrs. Wm. Semmler is ill with heart trouble.

## Obituary

John H. Jacobs, aged 69 years, a resident of Will County all his life, died Friday morning in the home of Emil Brockmann in Green Garden. He had been ill for sometime.

He is survived by one brother, George B., and four sisters, Anna Janssen, Hanna Galth, Katherine Dralle, and Minnie Eberhardt. The funeral services were held from the Brockmann home Sunday afternoon at one o'clock to St. Paul's church in Monee, with burial in the Green Garden cemetery, Rev. Gaebe officiating.

Clarice Oglesby, age 9 years, the daughter of Mr. and Mrs. Oscar Oglesby of Chicago Heights, died in her home there last Friday of flu and leakage of the heart. The funeral was held Sunday afternoon with burial in Pleasant Hill cemetery at Frankfort. She is survived by her parents, four sisters and one brother.

## ORLAND PARK

Mr. and Mrs. John Yunker of Orland celebrated their silver wedding anniversary last Thursday evening. A surprise party was planned for them by their children in the parlors of the St. John Evangelical church in Mokena. Sixty-five guests were present. Mr. and Mrs. Yunker were the bride and groom of a mock wedding ceremony. Harvey Cooper was the ring bearer; Mr. and Mrs. Wm. Keuch of Blue Island and Mr. and Mrs. Wischover of Frankfort were the attendants and Rev. W. J. Cramer tied the knot. After the ceremony there was a reception followed by a shivaree after which the party played buncos for the rest of the evening.

Wm. Yunker, our popular mail carrier, celebrated his fifty-fifth birthday last Friday evening. Mr. and Mrs. Ben Yunker of Tinley Park and Mr. and Mrs. Arthur Beagley and family were present and enjoyed an oyster supper.

Misses Alma and Marie Yunker attended a party at the John Schultz home Tinley Park, Saturday evening the party being in honor of Harry Schultz's 18th birthday.

Elinor May, infant daughter of Mr. and Mrs. Geo. Keuch is sick with the flu.

The Ladies Aid Buncos Club was entertained at the home of Mrs. Delia Steinhagen Wednesday afternoon. Prizes were awarded to the following: Mrs. John Loebe, Mrs. George Voght, Mrs. Anna Uthe, Mrs. Gahardt Koehler and Mrs. Henry Waite.

There were several ice accidents the past week. George F. Condor had his face badly hurt last Sunday while coasting. It was found necessary to take a few stitches in his tongue. Floyd Cooper and Raymond Glahn had their fingers hurt while coasting.

The week end guests at the Wm. T. Beagley home were Mr. and Mrs. Gordon Powell of Joliet and Mr. and Mrs. I. D. Marti of Mokena.

Mrs. George Scott is visiting in Cleveland, Ohio with her daughter. The P. T. A., are planning to present a play in the near future.

**EDITOR ASKED VIEW ON  
DRIVERS LICENSE LAW**  
(continued from front page)

physical examination. I am opposed to the idea of the application being in the form of an affidavit for the reason that false information can be easily be given and sworn to which would not be so easy under the mental and physical examination feature. In my opinion the real merit of a license law would be the power of revocation and suspension of licenses vested in courts of record and in mental and physical examinations. Further I feel that no license should be issued to any person who cannot read the English language and to any one who is known to be a drunkard. The license law should be kept out of the hands of wiley politicians so it will not become a mere political football and thus lose its effectiveness.

Wm. Semmler, Editor.

## TINLEY PARK

The Lions Club is working on a fine program for Ladies Night to be held the night of February 14th according to the tentative plans. The affair will be quite elaborate.

Henry Nieman who has been ill with the flu, is able to be up again. The icy pavements have caused a good many autos to land in the ditch and on Wednesday seven cars were reported in the ditch between 147th Street and Western Avenue.

The Lions Club is now working on the house numbering plan they took up last summer. Maps are being prepared and the numbering system may be installed before spring.

The big Bettenhausen milk truck tipped over in the ditch when the big truck skidded on the icy pavement on the way to Chicago. Some milk was spilled but the driver was not hurt.

Have you tried those dusting mitts at Dini's? Price 19c Adv.

George Schreiber has rented his flat to a Chicago party.

George Lorenz is on special jury duty in Chicago this week.

A nephew of Mr. and Mrs. George Lorenz residing in Chicago in company with three friends were all instantly killed when the auto they were riding in was struck by a fast Pennsylvania mail train at Calumet City, Sunday.

Rubber gloves at 21c a pair at the Ice Cream Parlor. Adv.

Chas. Miller attended the funeral of his uncle at Highland, Indiana, Monday.

Mrs. E. Freberg entertained the Tinley Park buncos club Thursday.

Harry Brighton and George Keleher have been injured by falls on the ice.

Mrs. Veletta entertained the 500 club last Friday.

Cottage for rent located on Oak Park avenue. Inquire at J. M. Klepper's, Tinley Park.

Do try taking seidlitz powders to finish getting rid of the flu at Dini's. Adv.

Mrs. John Funk, Mrs. Wallace B. Combs and Mrs. John Andres had a luncheon party in the Wedgewood room of Marshall Field's Monday.

## Let Us Laugh

The colored preacher was describing the "bad place" to a congregation of awed listeners.

"Friends," he said, "You've seen molten iron running out of a furnace, haven't you? It is white hot, sizzling and hissing. Well—"

The preacher pointed a long, lean finger at the frightened crowd.

"Well," he continued, "they use that stuff for ice cream in the place I have been talking about."

A man went into the auto sales-room and said, "I wish to see a roadster with a rumble seat."

"Yes, sir," said the salesman "here is a dandy car."

"But where is the rumble?" said the buyer.

"Oh, you'll hear it when we start," was the answer.

Mary has a little skirt,  
So neat, so bright, so airy;  
It never shows a speck of dirt,  
But it surely does show Mary.

## Producing Liquid Air

Liquid air is a transparent, limpid and intensely cold liquid, slightly blue in color, and of about the same density as water. It is prepared by subjecting air to great pressure and then cooling it by its own expansion to a temperature below the boiling point of its constituents (nitrogen, 194 degrees centigrade; oxygen, 183 degrees centigrade). Its chief use is as a refrigerant.

MITTEN DUSTER**

FITS THE HAND LIKE A GLOVE

**The Duster of a Thousand Uses**

With this Big Fluffy Chemically Treated Mitten Yarn Duster, a house wife can do her house cleaning in less time and with less effort, than is required with ordinary dusters. It does not only absorb and retain the dust as a Magnet attracts steel, but with the chemical elements retained in the Yarn by a patented process it cleans and polishes furniture and other woodwork around the house in one operation, leaving all cleaned surface with a lustre as beautiful as when new.

**A CAR OWNER'S DELIGHT**

It does not scatter dust from one place to another as common dusters do, but absorbs and retains it; and when soiled can readily be washed like any other yarn garment, and when dry is as clean and large and fluffy as when new.

With the aid of an Auto Mitten Duster a car owner can clean and polish his automobile in a few minutes, without soiling his hands or clothes; just once over and the car place to another as common dusters do, but absorbs and retains it; and when soiled can readily be washed like any other yarn garment, and when dry is as clean and large and fluffy as when new.

Today.  
There is a thing called yesterday,  
but that is only the dust-bin at the  
door, into which we cast our refuse,  
our failures, our worn-out souls. There  
is a thing called tomorrow, bursting  
with far better things than those  
which we have discarded. But in to-  
day the whole passionate force of the  
universe is poured—and therefore to-  
day is marvellous.—S. P. B. Mals.
